

170 Michaela Drive

Alpharetta, Georgia

A brand-new 5,120 sq ft home in Atlanta's premier school corridor — mispriced by its builder for eleven months, buyable at **17-19% below** what closed comparables support.

\$790K

EQUITY RAISE

6–14 mo

TARGET HOLD

LP BASE, ANNUALIZED

First-loss

GP CO-INVEST 10%

6 bed · 5.5 bath · 5,120 sq ft

New construction 2025 · 0.6 acre

2 min walk to Wills Park · Milton HS 10/10

THE OPPORTUNITY

A three-week market with one eleven-month listing

–20.2%

Seller's price cut so far —
\$2,695,000 → \$2,150,000

11 mo

On market — against a
~21-day submarket average

\$420–470

Per sq ft that closed comps
actually support — **\$2.15M–\$2.41M**

The house is not the problem — new 2025 construction, a two-minute walk to Wills Park, six minutes to downtown Alpharetta and Avalon, Milton High School district (10/10). The problem was a launch price of **\$526/sq ft** that only Avalon-adjacent product has ever achieved. The market said no for a year. **A fatigued seller is how good basis gets bought.**

WHY THE MISPRICING EXISTS

The seller has carried this project for 21 months

Spec builders carry construction debt at 9-13% — every month costs this seller roughly **\$15-20K**. Sellers in that position trade price for certainty. Our offer is that certainty: financing pre-arranged, no contingency theater. **If the seller won't meet the number, we walk** — the same discipline that protects your capital after we own it.

THE PLAN

Dual-track: sprint the sale, with the fallback built in

MONTHS 0-1

Acquire & reposition

Close at \$1.75M — 65% LTC bridge at ~9.5%. Professional staging, new photography, independent brokerage. Relist at ~\$2.2M (\$430/sq ft).

MONTHS 1-4 · TRACK A

Staged resale

This submarket clears well-priced \$2M homes in 1-2.5 months. The identical comp cleared one street over in 55 days. Contract by month 4 → capital + profit back in 6-8 months.

MONTH 4 TRIGGER · TRACK B

Executive carry

No contract → furnished executive tenant at ~\$8,500/mo (corporate relocation demand) covers ~70% of carry. Relaunch into the March-May 2027 selling season.

EXIT DISCIPLINE

Sale is the only exit

We tested refinance-and-hold honestly: 0.34 debt-service coverage — it doesn't exist. So we don't promise it. The bear case prices a sale at the \$2.05M comp floor instead.

The profit is bought at acquisition, not hoped for at exit

+\$135K

Base-case profit — exit \$2.2M in 8 months

25.9%

Deal-level annualized return, base case

SOURCES

Bridge loan · 65% LTC, 9.5% IO, 2 pts	\$1,137,500
LP equity · 90%	\$703,000
GP co-invest · 10%, first-loss	\$79,000
Total capitalization	\$1,919,500

USES

Purchase price	\$1,750,000
Closing + loan origination	\$44,600
Staging	\$25,000
Carry & interest reserve	\$74,900
Working capital	\$25,000

YOUR RETURNS

You are paid first. We are paid last.

Two ways to partner — pick the seat that fits

LP Syndication

SEVERAL PASSIVE INVESTORS · \$50K MINIMUM

- LPs fund 90% (\$703K) · GP 10% first-loss
- 8% preferred, then 70/30 — **no fees of any kind**
- GP executes everything; monthly reporting
- Major decisions require LP majority consent
- Base outcome: **14.7-21.9% annualized · ~1.15x**

Single-Partner JV

ONE CAPITAL PARTNER WRITES THE WHOLE CHECK

- Partner funds 100% of equity (~\$790K)
- 10% preferred, then 60/40 capital / operator · no fees
- Operator contributes deal, execution, guarantees
- Dual signatures on price, tenant, and exit
- Base outcome: **+\$101,800 · 19.6% annualized**; bull 51.8%

ROLE	LP SYNDICATION	SINGLE-PARTNER JV
Sourcing, negotiation, price discipline	GP	Operator
Debt guarantee / recourse carve-outs	GP	Negotiated — default operator
Staging, lease-up, asset management	GP	Operator
Disposition decision	GP · LP consent on majors	Joint approval
Capital at risk first	GP co-invest	Per JV agreement

ALIGNMENT

How we make money — and when we don't

\$0

Acquisition fee
Management fee
Disposition fee

30%

GP promote — earned only *above*
your 8% preferred return

-\$79K

What the GP loses first in the bear
case, while LP capital comes back
whole

In the base case the GP earns ~\$32K on \$79K invested — meaningful only because **your outcome was met first**. Discipline you can hold us to: the offer is **\$1,750,000** and the ceiling is **\$1,800,000**. If the seller says no, this deal dies and your capital is never called. The next mispriced listing gets the same model.

0%

What can go wrong

Exit below the comp band

Bear case fully modeled at \$2.05M: LPs whole, GP loses. All-in basis \$375/sq ft sits below every 2024-25 new-build print in the pocket.

It takes longer than planned

Track B lease covers ~70% of carry; 12-month bridge with extension; spring 2027 relaunch is the plan, not a scramble.

Rates rise — the Fed tilts hawkish

Zero rate relief underwritten. Fixed-rate bridge; exit buyer modeled at today's 6.6% jumbo. Any easing is upside.

The rental fallback doesn't exist

Correct — DSCR 0.23-0.34. We tell you now instead of discovering it at month 10. The exit is a sale, priced accordingly.

Illiquidity & concentration

One asset. Capital committed 6-14 months, no early redemption. Size your check accordingly.

Data risk

Listing data is index-derived. Offer contingent on FMLS verification, inspection, appraisal, and clear title.

The ask

\$790K

Total equity — \$703K LP + \$79K
GP co-invest

\$50K

Minimum LP commitment

8% + 70/30

Preferred return, then LP-
favored split

21 days

Close after contract acceptance

1. Soft-circle your commitment and preferred structure **this week**
2. We verify FMLS status and submit the **\$1.75M offer** with proof of funds
3. Contract → inspection, appraisal, title — **capital called only after diligence clears**
4. Close, stage, list — first investor report 30 days after closing, monthly thereafter

This presentation is for discussion with known contacts and is not a general solicitation or an offer to sell securities. Any offering would be made only through definitive documents (operating agreement or JV agreement, subscription documents) with full risk disclosures. Projections are estimates from the attached underwriting model, not guarantees. Real estate investments can lose money, including loss of principal.
