

CONFIDENTIAL • FOR DISCUSSION WITH PROSPECTIVE PARTNERS • JULY 2026

170 Michaela Drive Alpharetta, Georgia

A brand-new 5,120 sqft home near downtown Alpharetta, mispriced by its builder for eleven months — now buyable at roughly 17–19% below what closed comparables support.

\$790K

Total equity raise (incl. reserves)

6–14 mo

Target hold — dual-track exit plan

15–22%

LP annualized, base cases (A / B)

First-loss

GP co-invests 10% and absorbs losses first

SLIDE 02 • THE OPPORTUNITY

A three-week market with one eleven-month listing

–20.2%

Seller's price cut so far:
\$2,695,000 →
\$2,150,000

11 mo

On market — vs. ~21-day submarket average

\$420–470

\$/sqft that closed comps actually support

The house is not the problem: 6bd/5.5ba new construction (2025), 0.6 acre, a two-minute walk to Wills Park, six minutes to downtown Alpharetta

and Avalon, Milton High School district (10/10). The problem was a launch price of \$526/sqft that only Avalon-adjacent product has ever achieved. The market said no for a year — and a fatigued seller is how good basis gets bought.

SLIDE 03 • WHY THE MISPRICING EXISTS

The seller has been carrying this project for 21 months

Lot purchased October 2024 for \$570K, construction through 2025, then a failed listing at \$2.695M, a broker change — the builder now self-lists — and a cut to \$2.15M. Spec builders carry construction debt at 9–13%; every additional month costs this seller roughly \$15–20K. Sellers in that position trade price for certainty of close.

Our offer is that certainty: \$1,750,000, bridge financing pre-arranged, 21-day close, no financing contingency theater. If the seller won't meet the number, we walk — the same discipline protects your capital after we own it.

SLIDE 04 • THE PLAN

Dual-track: sprint the sale, with the fallback built in

1 Months 0-1 • Acquire & reposition

Close at \$1.75M (65% LTC bridge, ~9.5%). Professional staging, new photography, independent brokerage — list at ~\$2.2M (\$430/sqft), directly on the comp that cleared one street over in 55 days.

2 Months 1-4 · Track A: staged resale

The submarket clears well-priced \$2M product in 1-2.5 months. Under contract by month 4 → LP capital plus profit back in 6-8 months.

3 Month 4 trigger · Track B: executive carry

No contract by month 4 → place a furnished executive tenant (~\$8,500/mo; relocation demand from Alpharetta's 2025-26 HQ moves) covering ~70% of carry, and re-launch into the March-May 2027 selling season.

4 Exit · Sale is the only underwritten exit

We tested refinance-and-hold honestly: the asset cannot cover debt service as a rental (0.34 DSCR). So we don't promise it. The bear case prices a sale at the \$2.05M comp floor instead.

SLIDE 05 · THE NUMBERS

Sources, uses, and the base case

Sources

Bridge loan (65% LTC, 9.5% IO, 2 pts)	\$1,137,500

Every figure derives from the attached model (underwriting.xlsx / underwriting_model.py) with sourced mid-2026 inputs: 9.5% bridge, non-homestead taxes, 5.5% selling costs, no rate cuts assumed.

SLIDE 06 • YOUR RETURNS

The waterfall: you are paid first, we are paid last

1 **Return of LP capital**

100% of sale proceeds go to LPs until your \$703K is fully returned.

2 **8% preferred return**

LPs earn 8% annualized on invested capital before the GP sees any profit.

3 **Return of GP co-invest**

The GP's 10% co-investment sits junior to yours — it absorbs the first dollar of any loss.

4 **70 / 30 split above the pref**

Remaining profit splits 70% to LPs, 30% to the GP. No acquisition, management, or disposition fees — the promote is the only GP compensation.

SCENARIO · \$1.75M BASIS	TRACK A (6–10 MO)	TRACK B (10–14 MO)
	LP PROFIT · ANNUALIZED	LP PROFIT · ANNUALIZED
Bear — \$2.05M exit (comp floor)	\$0 · capital returned	\$0 · capital returned
Base — \$2.20M exit (mid band)	+\$102,800 · 21.9%	+\$104,100 · 14.7%
Bull — \$2.35M exit (spring premium)	+\$217,200 · 63.8%	+\$207,500 · 35.6%

■ Track A — staged resale ■ Track B — executive carry

Bear case honesty: at the \$2.05M comp floor the deal loses \$20–32K. The GP co-invest absorbs that loss in full — LPs get their capital back with no gain. If we overpaid (\$1.825M+), LPs would share losses; that is exactly why the offer is \$1.75M and the walk-away is firm.

SLIDE 07 · STRUCTURE

Two ways to partner — pick the seat that fits

LP Syndication

Several passive investors · \$50K minimum

- LPs fund 90% (\$703K), GP co-invests 10% first-loss
- 8% preferred, then 70/30 split — **no fees of any kind**

Single-Partner JV

One capital partner writes the whole check

- Partner funds 100% of equity (~\$790K); operator contributes the deal, execution, and guarantees

- GP runs sourcing, financing, staging, lease-up, sale; LPs receive monthly reporting
- Major decisions (sale below floor, hold extension) require LP majority consent
- Base LP outcome: **14.7-21.9% annualized** · ~**1.15x** in 8-12 months

- 10% preferred to capital, then 60/40 capital/operator — no fees
- Dual signatures on price changes, tenant selection, and exit; shared live dashboard
- Partner outcome, base: **+\$101,800 · 19.6% annualized** (Track A); bull: **+\$196,100 · 51.8%**
- Simpler docs, faster decisions, direct relationship

ROLE	LP SYNDICATION	SINGLE-PARTNER JV
Sourcing, MAO discipline, negotiation	GP	Operator
Debt guarantee / recourse carve-outs	GP	Negotiated (default: operator)
Renovation-lite, staging, lease-up	GP	Operator
Disposition decision	GP, LP consent on majors	Joint approval
Capital at risk first	GP co-invest	Split per JV agreement
Best fit	Passive checks, diversification	One relationship, more control

SLIDE 08 · ALIGNMENT

How we make money — and when we don't

No acquisition fee. No asset-management fee. No disposition fee. The GP is compensated exclusively by the 30% promote *above* your 8% preferred return, and the GP's own \$79K sits in first-loss position. In the bear case the GP loses real money while LP capital comes back whole. In the base

case the GP earns ~\$32K on \$79K invested — meaningful only because your outcome was met first.

Discipline you can hold us to: the offer is \$1,750,000 and the ceiling is \$1,800,000. If the seller says no, this deal dies and your capital is never called. The next mispriced listing gets the same model.

SLIDE 09 · RISKS, STATED PLAINLY

What can go wrong

RISK	REALITY & MITIGANT
Exit below the comp band	Bear case modeled at \$2.05M: LPs whole, GP loses. All-in basis \$375/sqft sits below every 2024-25 new-build print in the pocket
It takes longer than planned	Track B lease covers ~70% of carry; bridge term 12 mo with extension; spring 2027 relaunch is the plan, not a scramble
Rates rise (Fed tilts hawkish)	Zero rate relief underwritten; fixed-rate bridge; exit buyer modeled at today's 6.6% jumbo
Rental fallback doesn't exist	Correct — DSCR 0.23-0.34. We tell you this now instead of discovering it at month 10; the exit is a sale, priced accordingly
Illiquidity & concentration	Single asset, capital committed 6-14 months, no early redemption. Size your check accordingly
Data risk	Listing-portal data is index-derived; offer is contingent on FMLS verification, inspection, appraisal, and clear title
